Bavierstr. 4,
Erkrath, Germany

TECH-STACK

- Python
- Django
- FastAPI
- Flask
- Django REST Framework
- Postgres
- Javascript
- VueJS
- Docker, Celery, Redis, Nginx
- DevOps
- AWS/GCP
- SAAS
- Process Automation
- n8n
- CRM, ERP, WMS

SOFT-SKILLS

- Fast learner
- Passionate programmer
- Self-motivated
- Solution-focused
- Critical thinker
- Collaborative
- Adaptable

PROFILE

Experienced Automation and Full-Stack Engineer specializing in scalable web applications, APIs, and AI-driven automation systems. Skilled in building secure backend architectures, modern UIs, and end-to-end integration pipelines for e-commerce and marketplace platforms. Strong focus on cloud-native development, CI/CD, and system reliability, with experience in Agile, TDD, and software design best practices.

WORK EXPERIENCE

Simpli Switzerland GmbH, Switzerland

SINCE JAN 2026

Automation Engineer

- Architected scalable automation workflows for e-commerce and marketplace operations using Python, n8n, REST APIs, and AI-driven processing pipelines.
- Built intelligent product onboarding systems for automated listing preparation, AI-assisted enrichment, and synchronization across Shopify, Mirakl, and Galaxus.
- Managed cloud infrastructure on Amazon Web Services, including S3, VPC, CI/CD pipelines, and deployment automation for reliable production environments.
- Developed and maintained integrations between internal systems, third-party services, and marketplace APIs with monitoring and error tracking using Sentry.
- Applied AI engineering practices including RAG-based workflows, AI-assisted development with Cursor, and automated data processing to improve operational efficiency.

bao solutions GmbH, Munich, Germany

JAN 2020 - FEB 2025

Full-stack Software Developer

- Gained expertise in building secure APIs and optimizing databases using Python, Django, FastAPI, Flask, PostgreSQL, Django REST Framework, and Docker.
- Developed and improved complex user interfaces with modern frontend technologies, primarily VueJs.
- Contributed to micro-services projects following agile methodologies and Test-Driven Development for high-quality deliverables.
- Integrated third-party tools and APIs, focusing on CRMs, to enhance application functionality.
- Acquired hands-on experience with OpenAI-powered features, including LLM integration, Retrieval-Augmented Generation (RAG), vector databases, and prompt engineering
- Engaged in code reviews, idea sharing, mentoring, and continuous learning to foster team growth and innovation.

LANGUAGES

- English (Fluent)
- German (Working Proficiency)
- Hindi (Fluent)
- Nepali (Native)

Self-Learning & Exploration

JUN 2015 - DEC 2017

- Independently explored programming fundamentals and web technologies.
- Initiated self-paced learning in Python, Django, HTML, CSS, and JavaScript.

Hulash Steel Industries, Kathmandu, Nepal

JUL 2010 - SEP 2011

Industrial Engineer

- Specialized in designing electro-mechanical and hydro-mechanical components using AutoCAD, SolidWorks, and other engineering tools.
- Planned and monitored company projects to ensure efficient execution and on-time delivery.

EDUCATION

M.Sc. Energy Systems

OCT 2011 - MAY 2015

FH Aachen | Aachen, Germany

- Gained strong interdisciplinary knowledge in renewable energy, power systems, and energy efficiency
- Developed skills in systems modeling, data analysis, and sustainable energy technologies
- Worked on projects involving energy transition, smart grids, and energy optimization
- Gained exposure to policy, economics, and environmental aspects of energy systems

Bachelor in Industrial Engineering

OCT 2006 - JUN 2010

Tribhuvan University | Kathmandu, Nepal

- Built a solid foundation in systems thinking, process optimization, and operations research
- Studied engineering economics, production planning, and supply chain management
- Acquired analytical and problem-solving skills relevant to both engineering and business domains
- Worked on projects integrating technical and managerial decision-making
